ARYAN PATIL

REACT DEVELOPER | FRONTEND & FULL-STACK WEB DEVELOPMENT

Nagpur, Maharashtra, India • aryanpatil2006@gmail.com
github.com/aryanp685 • linkedin.com/in/aryan-patil-44a839336

PROFESSIONAL SUMMARY

Frontend-focused React Developer with hands-on experience building responsive web interfaces and developing product-oriented web applications. Comfortable working with React, JavaScript, and Tailwind CSS, with project experience across creator-focused SaaS, restaurant ordering, personal portfolio design, and security monitoring tools. Freelancing since 2024, translating requirements into usable interfaces and contributing to implementation, version control, and deployment. Interested in building reliable, accessible, and polished digital products while continuing to grow across the modern web development stack.

EXPERIENCE

React Developer — Freelance | Nagpur, Maharashtra | **2024 – Present**

• Develop small-business websites and landing pages using React, JavaScript, and Tailwind CSS, with an emphasis on clear layouts and responsive behavior.
• Turn client requirements and design ideas into functional user interfaces, refining page structure, styling, and usability for different screen sizes.
• Organize code and project changes with Git and GitHub, and support deployment workflows to make completed work available online.
• Work across the development process from understanding requirements to building, reviewing, and delivering front-end features.

Core technologies: React · JavaScript · Tailwind CSS · Git · GitHub

SELECTED PROJECTS

DealFlow

SaaS · Brand Deal Management

A creator-focused SaaS platform designed to manage brand partnerships in one place. Features include deal tracking, invoice ageing, automated follow-up sequences, UPI payment links, and CA-ready TDS/GST reports. The project description identifies production deployment and Razorpay / Stripe billing.

Stack: Next.js · TypeScript · PostgreSQL · Razorpay · Stripe
Live: dealflow-lyart-eight.vercel.app | GitHub: github.com/aryanp685/dealflow

Autodine

Restaurant Ordering Platform

A table-side ordering experience that lets restaurant guests scan a table card and submit orders directly from their phones. Orders reach the kitchen with the relevant table number and notes, reducing the need for customers to install an app or create an account.

Stack: React · Node.js · Tailwind CSS
Live: new-alpha-five-43.vercel.app | GitHub: github.com/aryanp685/autodine

Prahari

Security Monitoring Platform

A security monitoring dashboard for businesses, agencies, and managed service providers. It checks authorized websites for TLS configuration, DNS details, security headers, and exposed files, then organizes findings by severity with evidence and remediation guidance in a multi-tenant interface.

Stack: Python · FastAPI · React · Vite · SQLite · Docker
GitHub: github.com/aryanp685/prahari

Portfolio

Personal Website

A personal portfolio built around strong typography, motion-led interactions, and a polished browsing experience. Includes dark and light themes, smooth scrolling, and animation effects to present projects and development work.

Stack: React 19 · Vite · Tailwind CSS v4 · GSAP · ScrollTrigger · Lenis
GitHub: github.com/aryanp685/portfolio

TECHNICAL SKILLS

Frontend Development: React, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS v4, responsive design
Frameworks & UI: Next.js, Vite, GSAP, ScrollTrigger, Lenis
Backend & Data — project experience: Node.js, Python, FastAPI, PostgreSQL, SQLite
Tools & Workflow: Git, GitHub, deployment workflows
Payments — project experience: Razorpay, Stripe

EDUCATION

Bachelor of Computer Applications (BCA) — Pursuing
GH Raisoni College of Engineering and Technology, Nagpur
